Web Technologies
Exercise Sheet 5 – Final Tasks

Team 3: Jiahui Dai, Yana Halamakh, Wei Wei Tang

December 14, 2024

Contents

For the full project, you can visit our GitHub repository on:
`https://github.com/jdai01/CAI_WebTPr`.

1 Shopping Cart

2 Managing Orders

3 Discounts

4 Freestyle

- Products and orders are searchable by their IDs.

- Products can be filtered by type.

- Users can add and update billing and shipping addresses.

- Admins can validate or invalidate coupon codes (bug in display changes for coupons).

- Guest shopping carts are transferred to registered accounts.

5 Final Steps

Bugs fixed:

1. Added a hamburger menu for mobile users (fix for Exercise-Sheet-3 Style Modification).

2. Fixed product additions to the collection list (fix for Exercise-Sheet-3 Collection List).

3. Corrected product display and `pid` query handling in `product.php` (fix for Exercise-Sheet-4 Category and Product Page).

4. Fixed the randomized product page redirection (feature from Exercise-Sheet-3) to work with the updated 'product.php' and its product ID query.

Updates

- Standardized CSS classes.

- Deprecated collection list in favor of the shopping cart feature.
